

# FATTY KNEES

Starting with fiberglass lapstrake construction, the Fatty Knees is one of the strongest dinghies on the water. We chose a hand-laid lapstrake hull, Not just for aesthetics, but because it offers considerable strength and stiffness and is relatively lightweight. Her wide beam adds stability and a gentle sheer minimizes its chubby look.

The inner rail is teak and the outer rail is pressure-treated pine for easy maintenance and durability. The gunwhale guard is long-lasting Dacron® over rubber. The teak rudder and daggerboard are handmade.

Whether under sail or as a tender under tow, the boat, with a 7-inch deep skeg, tracks exceptionally well. She's easy to sail – lively enough in light air, tacking and jibing smoothly with virtually no leeway – and most importantly, safe even in rough weather. Her generous beam makes her less likely to flip. Her rigging is simple and with the standard kick-up rudder, you can sail right up to the shore.

Every Fatty Knees comes with the mast step, mast partner, daggerboard trunk and gudgeons installed for easy conversion to sail.

For those who yearn for a classic, solidly built dinghy that performs well, the Fatty Knees is truly a distinctive little yacht. She's a chunky little boat with plenty of room, exceptional stability, and yet appealing, graceful lines. And with almost 2,000 in use, owners still rave, "I love my Fatty Knees."
